

Thematic Sectors of the Exhibition

AUTOCOMPLEX (Autofilling Complex. Autoservice. Garage & Parking)

Petroleum and gas companies, wholesale suppliers of oil products and gas

Petroleum and gas companies
Oil refineries, wholesale suppliers of petroleum products and gas
Suppliers of oils and lubricants

Petroleum storage depots and gas terminals

Planning of petroleum storage depots and gas terminals
Construction of petroleum storage depots and gas terminals
Fuel tanks
Petroleum products and gas loading-unloading facilities
Custody transfer metering stations
Condensed gases metering and reloading equipment
Relief equipment
Scaffold bridges for automobile and railway filling systems

Transport and logistics as regards petroleum and gas

Fuel delivery vehicles, tankers, semitrailers, tanks for petroleum products
Tankers and semitrailers – tank cars for gas transportation and filling
Transport and logistics services

Filling station complexes (filling stations) and filling station equipment; petroleum products

Brand name company networks for petrol and LNG filling stations
Planning and setting up of turnkey petrol and LNG filling station complexes
Construction of fuel tanks, shelters and other structures for fuel and propellant gas filling stations
Lighting equipment for fuel and propellant gas filling stations
Petrol and fuel pumps
Pumps, filters to hold back detritus
Petrol pump filling nozzles
Hoses for fuel delivery vehicles and petrol pumps
Fueling equipment for small size waterborne transport
Gas pumps
Equipment for LNG-powered vehicles
Control systems and systems for cashless payment at fuel and propellant gas filling stations
Control desks, fuel level measuring equipment for petroleum products and liquefied hydrocarbon gases
Equipment for monitoring the quality of petrol, other petroleum products and liquefied hydrocarbon gases
Biofuel, dimethyl ether, hydrogen producing equipment
Biofuel, dimethyl ether, hydrogen filling equipment for transport

Alternative fuel vehicles

Gas, biofuel, dimethyl ether, hydrogen vehicles
Electric and hybrid vehicles

Vehicle services

Planning and setting up of turnkey vehicle service stations (Russian abbreviation: CTO), vehicle workshops
Vehicle service stations
Vehicle repair workshops
Tools
Diagnosis equipment
Measuring and monitoring equipment
Lifting platforms and equipment, compressors
Tyre balancing equipment
Tests stands for tracking and wheel camber and toe
Machines to install tyres
Accessories
Exhaust systems
Materials for car care
Lubricants

Car wash units, washing stations

Planning and setting up of turnkey vehicle car wash units and washing stations
Equipment for washing vehicles by hand and for chemical cleaning of vehicle interiors
Automatic car wash units
Water recovery units

Garages and parking

Architecture, design, setting up of turnkey garages, motels, camping areas, public car parks
Garage equipment
Ventilation systems
Automatic door and barriers units
Equipment for car parks
Road signs

Protection of the environment

Enclosing and designing the adjacent area
Waste water cleaning systems
Systems to recover water
Analysis equipment to determine the aggressiveness of corrosion and biological contamination
Monitoring systems for leakages and the technical state of filling stations and other objects for vehicle servicing
Devices and containers (tanks) to catch store used oil
Units and equipment to recycle waste

Control and payment systems

Control systems
Equipment for protected communication and access restricted
Cashless payment systems
Readers for credit cards
Tills and POS equipment
ATM's for cash

Shops sales, catering

Sales areas, equipment
Mini-shops
Vending machines
Fast food systems

Advertising and advertising technologies

Design of filling stations, vehicle service stations and vehicle objects from the point of view of advertising
Design and graphics
Construction materials
Notices, placards, illuminated advertising panels, display panels
Polygraphy
Advertising companies
Press, TV

Protection and monitoring systems

Industrial and fire safety, protection and prevention of emergencies
Interior and exterior lighting systems
Intercom units
Warning systems
Video monitoring systems
Roadway barrier systems
Safes

Insurance, financing

Insurance
Financial and consulting services
Leasing

Other

Work clothing
Training materials and programs
Further training
Technical literature
